

IGK Arena Footing

IGK Equestrian LLC manufactures the revolutionary TruStride footing surface that is dust free without the need to water. Through an analysis of the traditional issues in the ring—dust, watering, maintenance, inconsistent leg and tendon support—IGK Equestrian LLC offers a variety of arena surfaces/arena amendments using a unique recycled blend with the goal of providing a safer, more stable surface for the horse, as well as a healthier environment for both the horse and rider.

Components

- Ground Shoe Soles:** Recycled post-consumer component, which helps resist compaction and hardening of the arena surface.
- Pure Silica Sand:** Distinctively angular sourced sand which retains its structural integrity throughout the lifespan of the footing.
- Synthetic Fibers:** Virtually eliminates tracking by creating a root-like lattice structure that is both flexible and resilient.
- Wax:** A wax coating creates a completely dust-free footing with little to no maintenance requirements.

Recycled Product

IGK Equestrian has a long-standing commitment to using recycled materials to make innovative products. TruStride, LiteStride, and SoftShoe are the only footings on the market, which use recycled components. The synthetic fibers and the ground shoe sole rubber are both 100% recycled post industrial materials. IGK Equestrian is dedicated to both the protection and improvement of riding conditions for horses as well as the creative reuse of recycled materials.

About IGK Equestrian

IGK Equestrian LLC, a division of North Brook Farms, Inc., is a diversified manufacturing company with product offerings in the equine, commercial/industrial and consumer markets. Our products range from an animal comfort “mattress” and horse arena footing to alternative building materials, heavily centered on a recycled materials philosophy. As a company, we strive to deliver simple, cost effective solutions for our markets. IGK Equestrian LLC adheres to the creed of “looking for a better idea” which offers innovative solutions for our customers.

IGK Equestrian LLC benefits from the 21 years of experience of its parent company, North Brook Farms, Inc., that has been marketing and manufacturing cow and equine comfort products since 1989.

IGK Equestrian LLC’s main operations are located in Auburn, New York in the Finger Lakes region.

Arena Footing

“Well, have you ever ice skated on clean ice? ... had a blast making a perfect figure eight on our ‘clean ice’— awesome! It is like a perfect carpet right now with our footprints in it.”
TruStride® – Covered Outdoor Arena Zionsville, PA

TruStride®

TruStride® is a premium dust-free footing, revered in the equestrian community for its ability to eliminate watering, and maintenance, as well as providing traction, stability and support for diverse riding disciplines.

"...to let you know that all involved with the new arena surface are delighted with the results. Our excavator was particularly pleased with the workability of the material. Also noteworthy is the way it handled some of the unusually heavy rains we've had, including tropical storm Hannah." — **TruStride®**
Outdoor Arena Westport, MA

LiteStride®

LiteStride® is an economical dust-free arena footing that eliminates the need for watering, reduces maintenance requirements, and provides a supportive, responsive riding surface for both horse and rider.

"... the footing is wonderful. I love how quiet it sounds as the horses are going around. It feels so good not only to them but to me as I walk around and teach." — **LiteStride®**
Indoor Arena Branchville, NJ

SoftShoe®

SoftShoe® is a custom blend of premium recycled fibers and rubber, which can be integrated into an existing or new riding surface to provide superior cushioning, stability, and resist packing.
